

E.C. fertiliser

Composition: Phosphorus (as P2O5) 30%, potassium (as K2O) 40%, magnesium (as MgO) 1.5%, boron (B) 0.035, cobalt (Co) 0.001, copper (Cu) 0.088, iron (Fe) 0.175, manganese (Mn) 0.088, molybdenum (Mo) 0.001, zinc (Zn) 0.088 % w/v

toppit is a speciality liquid foliar fertiliser designed specifically for pulses (all types of peas and beans). Containing high levels of phosphorus, potassium and a full range of micro-elements, it provides all the essential nutrients the crop needs to maintain healthy growth and maximum yield. With no nitrogen included in the formula, the product meets the requirements for growing peas and beans in the UK (*1).

Recommendations Formulated for foliar applications, **toppit** is rapidly absorbed by the plant foliage (and roots) for rapid relief of nutrient deficiency, particularly useful during periods of high plant stress.

Application Rate toppit should be applied at a rate of 2- 5 litres / hectare in a minimum of 100 litres water / hectare. Spray applications should begin from 2 true leaves up until flowering. 2 or 3 applications per crop should be sufficient. For maximum crop potential toppit should be used in combination with CalFlux and Rainbow Wave.

For full information on the range of pea and bean products contact Bionature on 01673 838143, or via e-mail at info@bionatureagriculture.com, or visit www.bionatureagriculture.com.

*1- As suggested by the PGRO pulse agronomy guide 2017 and required by DEFRA / Environment Agency NVZ regulations 2015.

SHAKE WELL BEFORE USE.

PRECAUTIONS

Wear protective gloves/protective clothing/eye protection/face protection.

IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
